

# HARDWARE DESIGN MASTERCLASSES

Wrocław, Poland, 2020

## Basic information about the conference

### Target Audience

The main goal of Hardware Design Masterclasses'2020 (HDM'2020) event is the exchange of knowledge and experience among professionals in hardware design, such as:

1. Hardware design engineers
2. Principal hardware engineers, technical lead engineers
3. R&D engineers
4. Managers of hardware design and R&D activities
5. Technical project managers
6. Field Application Engineers and any other technical supporting persons
7. Directors and managers of R&D centers

### Conference profile

The HDM'2020 conference profile fills the gap on Polish Conference market as it focuses on practical approach in professional and new technology hardware design, such as IoT and space technology. HDM'2020 creates a space for professionals to exchange knowledge, to acquire business relations and to develop future cooperation possibilities. This first edition is strongly focused on key emerging technologies such as: Internet of Things, High-speed & RF technologies and Space telecommunication. Wrocław's location, where the event takes place, is Poland's "Silicon Valley" with numerous IT and High-Tech companies headquartered here.

HDM'2020 sessions are divided into four case-study lectures and four workshops. All these panels aim for practical approach, use-cases, live measurements or design, practical exercises and experiments. Apart from the meritorical content, the conference is also to be a platform for leading electronic companies to present their profile and products on exhibit stands. Detailed information is provided in section "Sponsorship offer".

54-405 Wrocław, Poland

## Venue and date

Conference is taking place in Novotel Centrum Wrocław, Poland, on 26th of November 2020, from 8:00 until 17:00. Currently, due to the COVID-19 situation, the total number of participants is limited to 80 attendants. Should there be additional restrictions affecting the event due to a pandemic situation, the conference date will be postponed and the Organizer will provide necessary information.

## Sponsorship offer

HDM'2020 will gather professionals in the field of electronics and thus will provide a unique environment for building cooperation, acquiring new professional contacts as well as developing future business opportunities related in the fields of hardware components, measurement equipment and services. Our offer of sponsorship package includes the following benefits:

1. attendance in the full conference program for two company's representatives
2. company's exhibition stand
3. conference materials
4. optional: possibility to present your company by conducting workshop or lecture
5. dedicated time for sponsorship presentation
6. company's presentation (short description, contact details) included in printed conference materials
7. any additional sponsorship requests may to be individually discussed ([kontakt@doktortronik.pl](mailto:kontakt@doktortronik.pl))

## Conference organizer

The conference will be organized by MikroSig Rafał Stępień company that has its own brand DoktorTronik ([www.doktortronik.pl](http://www.doktortronik.pl)). We specialize in technical trainings in the fields of IoT, high speed and RF designs as well as DC/DC converters, signal processing and circuit theory. Owner of the company, Rafał Stępień, Ph.D., has more than 12 years of experience in designing electronics circuits. Currently he holds a position as a Technical Team Leader and Technical Advisor for the Board of Management of BCAST Ltd. in the fields of IoT and DAB+ technology and works as a senior hardware design engineer in Etteplan Poland.
